Overview

CUTTING-EDGE
CONNECTIVITY

About Smiths Interconnect

We Offer

Smiths Interconnect is a leading provider of high reliability connectivity products and solutions serving segments of aerospace and defense, medical, semiconductor test, and industrial markets. It designs and manufactures technically differentiated electronic components, microwave, optical and radio frequency products and sub-systems that connect, protect and control critical applications.

A comprehensive product portfolio providing customers with a single point of supply across multiple markets.

Our technology brands (EMC, Hypertac, IDI, Lorch, Millitech, Plastronics, Reflex Photonics, RF Labs, Sabritec, TECOM, TRAK and HSI) are synonymous with exceptional performance in technologically advanced, high quality solutions required for a high degree of safety and durability. Our extensive product portfolio includes high reliability electrical connectors and cable assemblies, rugged embedded transceivers, solutions for antenna systems, and a wide range of innovative RF and microwave solutions.

Smiths Interconnect is part of Smiths Group plc, a global leader in applying advanced technologies for markets in threat and contraband detection, energy, communications and engineered components.

Technology Brands

PLASTRONICS

A leading supplier of burn-in test socket solutions for all the latest packaged devices. With the most comprehensive QFN catalog in the world, in addition to a large portfolio of sockets for burn-in, HAST, failure analysis and other test requirements for Leaded, LGA and BGA devices.

IDI

World's most comprehensive offering of spring probe based solutions, including: contacts, connectors, interposers, semiconductor test sockets, and ATE interfaces. Proven off-the-shelf and custom products deliver the best solution for the customer's specific application.

HYPERTAC

Premium interconnect solutions for electrical and electronic applications requiring optimized quality, performance, and reliability. Hypertac connectors utilize the original high performance hyperboloid contact technology; ideal for harsh environments and safety critical applications.

HSI

Joint venture with Sichuan Huafeng Enterprise Group Co. Ltd, one of the major manufacturers of electronic components in China. Industry-leading connectivity solutions for commercial aerospace and railway markets in mainland China.

SABRITEC

High speed quadrax, twinax, fiber optic, filter, coax and triax connectors, contacts and cable assemblies. Custom multi-pin circular, D-Sub rack and panel connectors and MIL-Spec interface type products.

EMC

Board-level components incorporating advanced resistive and signal distribution technologies for a broad range of frequency spectrum applications. Extensive portfolio of RF devices used to attenuate, level, or terminate signals available in a variety of packages and footprints.

Connectors

Fiber Optics & RF Components

Semiconductor Test

RF/MW Subsystems/Smiths Interconnect Inc (SII)

LORCH

Innovative solutions for the electronics and communications industries. Ranging from high performance wireless and RF products to micro-miniature, cavity, discrete, waveguide, tunable, ceramic, and printed filters and integrated assemblies.

REFLEX PHOTONICS

Embedded transceivers and transmit/receive modules for advanced interconnect-based solutions. Targeting high data rate interconnects where ruggedness and radiation resistance are required for defense, space, commercial aerospace and industrial applications.

RF LABS

High performance microwave cable assemblies and coaxial components supporting high performance operations, application-specific premium interconnects for high durability and harsh environments.

MILLITECH

Specializing in the engineering, manufacturing, and testing of millimeter-wave components, assemblies, and fully integrated subsystems for space, SATCOM, test and measurement, radar, and scientific applications.

TECOM

Industry leading innovator of antennas and positioning systems for SATCOM in-flight connectivity, instrumentation, datalink, command & control, and telemetry applications integrated into the world's most advanced commercial and military platforms.

TRAK

High reliability multi-function RF systems, ferrite microwave products, and precision time & frequency systems for defense, commercial aerospace, space, homeland security, and public safety applications.

Our Markets

Aerospace & Defense

Commercial Aerospace

We connect customers around the world with our high speed in-flight SATCOM terminals. Our relentless pursuit of innovative high performance connectivity solutions enables us to provide high density, high power handling, EMI/EMP protection, RF and high speed capabilities focused on the next generation of airframe applications.

- Avionics Equipment
- Engine Systems
- Power Distribution
- SATCOM Broadband Connectivity

Communications

Wireless Infrastructure

Our solutions help evolution to 5G, while maximizing the use of existing infrastructure. Our components and sub-systems help ensure reliability in mission critical wireless communications.

- 4/5G Networks
- Remote Radio
- Installations
- Distributed Antenna Systems
- Data Centers

Semiconductor Test

We develop sockets and probe card products that ensure superior quality and reliability in testing applications. Our solutions support the finest micron pitches while meeting requirements for higher bandwidths.

- Area Array Test
- Package-on-Package Test
- Wafer Level Test
- Peripheral Package Test

Industrial

Transportation

We offer multiple interconnect technologies able to withstand harsh environments of extreme temperatures, pressure, shock and vibration, ensuring system quality and reliability.

- Rolling Stock
- Signaling
- Infrastructures
- Vehicles
- Automotive
- Unmanned Vehicles

Defense

We partner with our customers to design and manufacture products and solutions including connectors, cable assemblies, multi-function RF systems, SATCOM terminals, datalinks, and antennas to achieve optimal system performance in the most demanding end-user environments.

- Radar
- Electronic Warfare
- Integrated Vehicle Systems
- Intelligence, Surveillance, Reconnaissance (ISR)

Space

We engineer superior NASA and ESA-certified solutions to ensure continuous connectivity within environments where shock and vibration, corrosive atmosphere, and thermal deviations are prevalent.

- GEO/MEO Satellites
- LEO Satellites
- Launchers
- Ground Support Equipment

Test & Measurement

We create high quality connector and cable assemblies that deliver increased phase stability, decreased insertion loss, and design flexibility for long lasting performance in lab and production test environments.

- Electronics Testing
- Automotive Testing
- Telecommunications
- RF and Microwave Testing

Medical

We provide solutions that protect, connect, and control critical medical devices which meet requirements for invasive procedures, disposable components, embedded electronics, high cycle life, and sterilization.

- Surgical Systems
- Patient Monitoring
- Imaging Systems
- Disposables

Industrial

We design durable and robust platform products and customized solutions combining rugged backshells with high reliability contact technologies for easy assembly.

- Heavy Equipment/Machinery
- Industrial Automation
- Utilities

Cable Assemblies

Premium Interconnects

High performance microwave cable assemblies and coaxial components supporting critical operations with application-specific premium interconnects for high durability. Embedded with RF Florida Lab technology, our cables are available with customized option packages and are especially well-suited for precision testing applications and harsh environments in aircraft, marine, space and ground applications.

**Well-suited for
precision testing
applications
and harsh
environments**

ASR Precision Test

- High performance VNA test cables for precision testing applications
- Maintains mechanical configuration for consistent, repeatable test results
- Available with a wide range of connectors including 2.4 mm and 2.92 mm NMD connectors
- Individual or phase matched pairs

Lab-Flex®

- Field-proven up to 50 GHz
- 40% lower insertion loss than solid dielectrics
- Solder sleeve cable-connector termination delivers superior electrical performance and pull retention
- Shielding: <90 dB
- Stranded center conductors available (Lab-Flex® S)
- Phase stable (Lab-Flex® T) and phase matched options available

Semi-Rigid, Conformable & Flexible

- High frequency
- High isolation up to >100 dB
- Copper, Aluminum and Tin filled composite jackets
- Range of protective coverings available
- Low loss options available in Silver and Tin plated outer conductors

SpaceNXT™ QT Series

- Space qualified flexible cable assemblies
- Mode-free frequency response up to 50 GHz
- Radiation resistant jacket materials tested up to 100Mrad total dosage (~15 years flight life)
- Available with wide range of connectors and add-on testing packages for configurable products to meet all design and schedule constraints
- Flight heritage and qualification reports available upon request

Titan-Flex®

- Robust solder termination
- Crush-resistant and durable
- Superior electrical performance over comparable products
- Optimized braiding construction for excellent shielding to 18 GHz

Connectors

Reliability and Safety

Through our Hypertac, HSI, IDI and Sabritec technology brands, we supply application-specific, high-reliability electrical interconnect solutions from highly integrated assemblies to microminiature connectors and spring probe contacts. The core of our advanced interconnect solutions is our contact technologies: Hyperboloid, Spring Probe, High Speed, Fiber Optic, High Power and High Temperature.

**Providing
exceptional
performance
in critical
applications**

Circular

- Available in metal and plastic shells
- Crimp and solder terminations
- Push-pull and color-coded options

EMI/EMP Filter

- Intermateable and interchangeable with standard non-filter connectors
- C, L, and Pi style EMI filters
- TVS protection meeting the requirements of RTCA D160, Section 22, up to Level 5

High Power

- Standard 100 and 150 ohm split pair quadrx, quadrx, and twinax contacts
- Excellent power performance up to 700 Amps
- Suitable for harsh environmental condition
- High number of mating cycles

High Speed

- Standard 100 and 150 Ω quadrx and twinax contacts
- Formats MIL-DTL-38999, ARINC 600, MIL-DTL-83527, and D-Subminiature
- Manufacturing to Fiber Channel, Ethernet, Firewire, USB, and DVI protocols

Modular/Rectangular

- Configurable with signal, power, RF, twinax, triax, quadrx, and fiber optic contacts into a single connector
- Guided hardware for blind mating

PCB

- Low, medium, and high density connectors with long life cycle
- Signal, power, coaxial, and high speed configurations
- Board-to-board, cable-to-cable, cable-to-board, and stacking

Spring Probe Interposers

- High insertion life
- Suited for blind mate connections
- Low profile, high compliance ratio
- Ideal for high shock and vibration environments

Defense Antenna Systems

Specific Application Knowledge

Smiths Interconnect offers antenna systems for Aerospace & Defense applications, from SATCOM, GPS, flush mounted, micro strip, blade instrumentation & data-link to fixed and mobile positioning systems. Our broad portfolio of off-the-shelf and build-to print solutions featuring TECOM and Millitech innovative technologies is designed to meet specific end-user needs.

**Design to
specification and
off-the-shelf
antenna
solutions**

Airborne/Missile/Space

- Broad range of off-the-shelf and build-to-print antenna systems designed to meet program-specific needs
- Full line of high performance telemetry, MDI and tracking beacon antennas specifically designed for flight instrumentation data collection in extreme mission critical operational environments
- Directional, omni-directional, and hemispherical configurations including Log Periodic, Biconical, Parabolic, El-Par, and CSC2 antennas

Antennas & Quasioptical Products

- Full range of MMW antenna products and technologies including aperture, reflector, and lens-based antennas
- Standard models from 325 GHz to 100 GHz
- Custom designed antenna arrays available
- Additional offerings: polarizers, orthomode transducers, monopulse comparators, waveguide rotary joints & precision corner reflectors for RCS references

Positioners/Controllers

- Fixed and mobile positioning systems for use in range telemetry, flight termination, airborne and ground datalink, target tracking and jamming, signal intelligence, and direction finding applications
- Ranging from man-portable to 7 meter installations, rack mounting or embedded in the pedestal
- Turnkey solutions available with reflector and feed assemblies from 325 GHz to 100 GHz
- Designed to meet environmental MIL-STD requirements

Wideband Antennas

- Broad portfolio of wideband and directional antennas for broadband surveillance, tracking, direction finding and jamming systems
- Frequency range from 20 MHz to 40 GHz
- Omni-Directional, Log Periodic, Biconical & Planar Cavity-Backed Spiral antennas

Ferrites & Passive Sub-Assemblies

High Performance Components

Smiths Interconnect offers a wide range of ferrite devices and waveguide products featuring TRAK brand technology that are ideal for a variety of space, defense & commercial applications. Our product range includes isolators and circulators, combiners, transitions, terminations, iso-adapters and integrated assemblies.

**Ideal for a
variety of space,
defense and
commercial
applications**

Coaxial

- Wide range of isolators, circulators, loads, terminations and attenuators
- Designed to operate from 300 MHz to 26 GHz
- Unique solid connectors (male/female connector barrel machined to be integrated in housing) with female and male orientations, in SMA and TNC styles
- All products are optimized for thermal and dynamic operational environments

Microstrip, Surface Mount & Stripline

- Isolators and circulators
- Stripline devices operating in assigned bands from 0.4-18 GHz
- SMT devices in S, C & X-bands suitable for pick and place and re-flow soldering
- Microstrip offers a unique blend of broad band operation, low mass and low profile with devices available in assigned bands from 2.2 to 32GHz

Passive Sub-Assemblies

- Full waveguide band isolators and circulators
- High power waveguide circulators for protecting TWTs
- Standard models from 18 to 260 GHz
- Low-pass, band-pass, and high-pass waveguide filters
- Waveguide diplexers and triplexers
- Metrology grade lab assets
- Able to deliver solutions for classified requirements

Waveguide

- Isolators, circulators, combiners, couplers, loads, transitions, terminations, and multi-function assemblies
- High power waveguide circulators/isolators for protecting TWTs up to 32GHz
- All products are optimized for thermal and dynamic operational environments
- High power devices are supplied as junction or differential phase shift types
- Where appropriate, devices are supplied with cooling/thermal management systems and additional functionalities as required

Filters

Advanced Quality

Smiths Interconnect provides technically advanced, high quality Lorch technology RF Filters, Multiplexers, Switched Filter Banks and Integrated Assemblies, from 100 KHz to 90 GHz. Our rigorous design, manufacturing & inspection criteria processes and procedures ensure products that are fully compliant to each application's unique specifications.

**Rigorous design,
manufacturing
and inspection
criteria**

Cavity

- Frequency range: 30 MHz to 80 GHz
- Bandwidth: 3 dB from 0.5 to 66%
- High "Q", low loss
- High power
- Helical, combline, inter-digital and coaxial

Ceramic

- Frequency range: 400 MHz to 6,000 MHz
- Bandwidth: 0.5 to 10%
- Surface mount, PC mount, connectorized options
- Stand-alone or diplexed

Discrete

- Frequency range: 5 MHz to 10 GHz
- Bandwidth: 3 db to >100%
- Band-pass, low-pass, high-pass, or notch
- Surface mounts, pins or connectors

Integrated Assemblies

- Frequency range: 500 MHz to 18 GHz
- 2 to 9 channels available
- Use of both MIMIC and solid state switching
- Connector or RF pin launch
- Hermetic seal available

Planar X

- Compact size
- Light weight
- Excellent rejection characteristics
- Low insertion loss

Tunable

- Frequency range: 24 MHz to 4,000 MHz
- Direct readout
- Octave tuning
- High power

Waveguide

- Frequency range: 2 GHz to 90 GHz
- 2 through 20 sections
- W/G flange, or connectorized
- Stand-alone filters, filter banks, diplexer and multiplexers
- WR-159 to WR-19
- Band-pass, low-pass, high-pass, and notch filters

Multi-Function RF Systems

Compact Ultra-Low Noise

Our Multi-Function RF Systems incorporating TRAK and Millitech technologies include compact ultra-low phase noise and spurious frequency sources and exciters, high dynamic range block and tuned frequency converters, receivers and receiver protectors, amplifiers, for harsh military, aerospace and space environments enabling EW, communication, SATCOM, remote sensing, and datalink systems.

**Custom and
standard high
performance
solutions**

Complex Frequency Sources

- Low phase noise
- Low spurious
- Synthesized and direct

Radar Exciters

- Electronic and mechanical vibration mitigation
- Size/weight reduction
- Increased processing capability

Receiver Protectors

- Discrete diode and MMIC limiters
- Receiver filter
- LNA
- T/R blanking switch
- Ferrite isolators

Transceivers

- Single and multi-channel integrated assembly
- Up/Down Converter
- 10 MHz reference
- Power supply
- 25W PA

Up/Down Converters & Receivers

- Single and multi-channel
- Integrated up/down converter and exciter with fast hopping synthesizer
- LO and vibration mitigated reference source
- Through 325 GHz

Vibration Mitigated Master Oscillators

- Ultra-low phase noise
- Crystal based
- Ovenized and non-ovenized

Radio Frequency Components

Advanced Technologies

Our high-performance board-level components featuring EMC technology incorporate advanced resistive and signal distribution technologies for a broad range of frequency spectrum applications. Our extensive portfolio of RF devices is used to attenuate, level, or terminate signals available in a variety of packages and footprints for demanding high reliability environments.

Available
in a variety of
packages and
footprints

Attenuators

- Operating frequencies up to 50 GHz
- Superior broadband performance
- Space and military qualified
- Wide range of attenuation values
- Surface mount and wire bondable packages

Diamond RF Resistives®

- Highest power to size ratio resistive components available
- Extremely low parasitic capacitance resulting in broadband performance
- Standard footprints available from 0402 (20 watts) up to 2010 (300 watts)
- Substantial size and weight reduction for space and high reliability applications
- Easy to implement packages; solderable & wire-bondable chips or tabbed and flange options are available

Resistors

- Wide range of resistance values: 1-1K ohms
- Power handling up to 1500 watts
- Operating frequencies up to 30 GHz
- Tight tolerances are available: ± 5 , ± 2 or ± 1
- Various finishes available: Tin/Lead, Silver & non-magnetic
- SMT & wire-bondable chips, tabbed and flange options or rod

Signal Distribution

- Resistive power dividers, Wilkinson power dividers and power samplers
- 2, 3 & 4 way power splits options available
- Operating frequencies up to 50 GHz
- Surface mountable packages

Terminations

- Optimized impedance matching and Low VSWR
- Power handling up to 2.2 kilowatts
- Operating frequencies up to 67 GHz
- Multiple substrate options: Alumina, Beryllium Oxide & Aluminum Nitride
- Large selection of mounting styles: solderable SMT & wire-bondable chips or tabbed and flange options are available

Thermopad®

- Passive solution for gain variation over temperature
- Operating frequencies up to 36 GHz
- Multiple attenuation and temperature shift values
- Footprint compatible with fixed attenuator series
- Standard HR (High Reliability) tested options available
- Surface mount and wire bondable packages

SATCOM Systems

Gate-to-Gate Connectivity

Smiths Interconnect offers a complete line of network flexible Ku-band and Ka-band SATCOM antenna systems enabled by industry leading TECOM technology. Our SATCOM antenna systems provide non-stop gate-to-gate in-flight connectivity for commercial air transport, business jet and various military applications.

High speed
network agnostic
connectivity

Antenna Control Unit

- Provides antenna positioning command and control
- Interfaces with aircraft for navigation information

Ka-Band Antenna Systems

KaStream® 5000 Series

- Light weight fully integrated 3 LRU system
 - High gain antenna system with integrated High Power Transceiver (HPT)
 - Antenna Control Unit (ACU)
 - Modem agnostic (customer selected)
- Broad frequency coverage for commercial and military use
- Real time switchable dual polarization
- Operates on global Ka-band HTS satellite networks

Ku-Band Antenna Systems

KuStream® 5000 Series

- Light weight fully integrated 3 LRU system
 - High gain antenna system with integrated High Power Transceiver (HPT)
 - Antenna Control Unit (ACU)
 - Modem agnostic (customer selected)
- Full Ku-band spectrum coverage for military and commercial use
- Gate-to-gate connectivity
- Operates on global Ku-band networks and new HTS satellites

Ku-Band High Power Transceiver

- Qualified for commercial airborne use
- Modular BUC, BDC, SSPA, power supply and controller in compact package
- Optional internal reference ensures compliance when exposed to random vibration DO-160 profiles

Ku-Band Antenna Systems

KuStream® 1000 Series

- Integrated 4 LRU system
 - Satellite Antenna Assembly (SAA)
 - Antenna Control Unit (ACU)
 - High Power Transceiver (HPT)
 - Modem agnostic (customer selected)
- Large Install Base
 - Over 1000 aircraft installations
 - More than 15 million flight hours
 - Commercial and military variants
- Market leader
 - Full Ku-band spectrum coverage for military and commercial use
 - Full compliance with stringent FCC regulatory standards
 - Gate-to-gate connectivity
 - Operates on global Ku-band networks and new HTS satellites

Semiconductor Test

Best-in-Class

Smiths Interconnect's test socket and probe card solutions utilize IDI contact technology to ensure superior quality and reliability in semiconductor test applications. The acquisition of Plastronics expands Smiths Interconnect's product portfolio for the reliability test segment. Our best-in-class engineering, development and technical expertise ensure support of automated, system level, burn-in and development test platforms.

**Superior quality
and reliability in
semiconductor test
applications**

Burn-In Sockets

- Extensive portfolio of socket design solutions for all IC packages
- H-Pin® technology for unmatched electrical performance
- Tri-Temperature testing capability with H-Pin® contact technology
- High speed signal integrity solutions supporting all IC packages
- Thermal optimization for advanced IC Burn-In requirements
- Variety of verification tools and design standards to ensure out of the box performance

Replacement Spring Probes

- Available to support all Interconnect Test Sockets including DaVinci, Volta, Array and Celsius
- Long life cycle
- Manufactured with superior engineered materials
- Low and stable contact resistance
- High compliance
- Superior signal integrity

Test Sockets

- Extensive portfolio of spring probe, scrubbing and other contact technologies
- Variety of verification tools and design standards to ensure simultaneous engagement and alignment to both package sides
- DaVinci technology for high speed coaxial test
- High performance Elastomeric contact technology
- Tri-Temperature testing capability with Celsius scrubbing contact technology
- High speed signal integrity solutions supporting most IC packages

WLCSP Probe Head

- Utilizing spring probe and other contact technologies
- Capable of testing 180µm and higher pitch
- High site-to-site test parallelism
- Superior signal integrity and high speed / RF testing capabilities
- Low and stable contact resistance
- Increased test throughput

Time & Frequency Systems

Emergency Response Systems

We provide timing and frequency solutions for the next-generation in emergency response systems, and more. Embedding the renowned TRAK technologies, our solutions offer accuracy, stability, and remote manageability that are critical for the success of the end user's applications.

**Solutions
offering accuracy,
stability,
and remote
manageability**

Distribution Systems

- Stand-alone and modular solutions
- Pulse rates, reference frequencies, and time codes
- Redundant and non-redundant configurations
- Low phase noise reference frequency distribution

GPS Clocks

- High performance, cost effective, small form factor
- High stability ovenized oscillator or optional rubidium oscillator
- AC and DC power inputs to meet power requirements
- Remote configuration and monitoring through Ethernet and RS-232

Modular Systems

- Dual-redundant modular system
- For high reliability applications requiring uninterruptable 24-7 service
- Redundant GPS RX, high stability OCXO or rubidium, time and frequency generator, and NTP servers
- Six, 4-channel distribution module providing 24 outputs. Expansion shelf available

Network Time Protocol (NTP) Servers

- Designed for time synchronizing networks using IRIG-B as the time reference
- Accepts a fiber optic or wireline IRIG-B time code
- Time synchronization of SIPRNET and NIPRNET
- Remote configuration and monitoring via Ethernet and RS-232

Tactical Global Positioning Systems (GPS)

- Compact, rugged enclosure
- Contains rubidium oscillator and low phase noise clean-up oscillator meeting frequency stability, and phase noise requirements of the military SATCOM system
- Remote configuration and monitoring via Ethernet and RS-232
- Standard C/A-Code GPS or optional SAASM GPS

Time Code Processors

- Modular construction with over 100 module options
- Standard C/A-Code GPS or optional SAASM GPS
- Wide variety of outputs are available
- Remote configuration and monitoring is available through Ethernet and RS-232

Optical Transceivers

Advanced Solutions

Embedded optical transceivers modules with Reflex Photonics technology for advanced interconnect based solutions. Targeting high-reliability interconnects where high data rate communication links with low SWaP are required. Space-qualified versions are also radiation resistant.

**Rugged
embedded
transceivers for
harsh environment
interconnect**

Mid-Board Space-Qualified Optical Transceivers

- Space heritage (TRL 9) since 2021
- Small: Height as low as 5.5mm with interposer
- Space qualified for radiation, shock and vibration, TVAC, and outgassing
- Expected life: Up to 20 years
- Cold start temperature: -55°C
- 10 and 25 Gbps data rates on 4-lane transceivers and 12-channel transmitters/receivers
- Operating temperature: From -40°C to 85°C
- Sensitivity: Up to -9dBm @ BER 10^{-12}
- Power consumption: As low as 85 mW/lane (<10 pJ per bit)
- LGA interposer interface

Rugged Backplane Optical Modules

- Compliant with VITA 66.5-defined backplane connectors
- Performance: 1 Gbps up to 28 Gbps/lane
- Operating temperature: From -40°C to 85°C
- Low power consumption: As low as 100 mW/lane
- Ultra-high port bandwidth density of up to 720 Gbps full-duplex in a half-width slot
- Rugged: MIL-STD 883 shock and vibration qualified
- Sensitivity: Up to -12 dBm @ BER 10^{-12}
- Ingress protection: Moisture, thermal and shock resistant
- Maximizes board space on 3U and 6U high-speed switch and payload VPX boards

Rugged Mid-Board Optical Transceivers

- Proven: Used in many defense applications
- Small: Height as low as 5.5mm with interposer
- Rugged: MIL-STD 883 shock and vibration qualified
- Sealed: Moisture and thermal shock resistant
- Storage temperature: -57°C to 125°C
- Performance: Up to 28 Gbps/lane
- Operating temperature: From -40°C to 85°C
- Sensitivity: Up to -12dBm @ BER 10^{-12}
- Low power consumption: As low as 100 mW/lane
- Channel configurations: 4TRx, 12TRx (10G only), 12Rx, and 12Tx

High bandwidth,
low latency and SWaP
in differentiated
high reliability
applications

Global Capabilities

Reliable Solutions

In-house capabilities encompassing design, development, manufacturing and testing to anticipate market needs, respond quickly and accurately to customers, and provide the most reliable connectivity solutions.
